IMPORTANT NOTES:

Track Type/Altitude Conversions

The standards listed in this document are applicable for performances on a 200 meter banked or oversized track. For specific events, the DII Indoor Track Facility Indexing Conversions will be used to convert times. Altitude adjustments are also available for all running events. Information regarding altitude adjustments, track indexing conversions and the Indexing Conversion Calculator can be found online at <https://www.ncaa.org/championship/division-ii/indoor-track-and-field/> under additional resources.

Event Conversions

Below are the permissible event conversions for NCAA indoor track and field. The Standardized Track Event Conversion Factors will be used to convert times for the non-championship events listed below to determine whether times achieved meet the qualifying standards noted above. The Standardized Track Event Conversion Factors can be found online at <https://www.ncaa.org/championship/division-ii/indoor-track-and-field/>.
