## Qualifying Standards

- The "A Standard" for individual events is calculated by using the three-year average of the eighth best time on the performance list unless the current "A Standard" is faster than the three-year average.
- The "B Standard" for individual events is calculated by using the three-year average of the $125{ }^{\text {th }}$ best time on the performance list unless the current "B Standard" is faster than the three-year average.
- The "Qualifying Standard" for relay events is calculated using the three-year average of the $16^{\text {th }}$ best time on the championship finals performance list unless the current "Qualifying Standard" is faster than the three-year average.
- The "Provisional Standard" for relay events is calculated using the three-year average of the $24^{\text {th }}$ best time on the championship finals performance list unless the current "Provisional Standard" is faster than the three-year average.

## Conversions

To convert a metric time achieved in a 25 -meter racing course to an equivalent time for a 25 -yard racing course: (a) transform the achieved metric time into seconds; (b) carrying the calculation out to five decimal places, multiply the transformed time in seconds by appropriately following the conversion factor; (c) drop, without rounding, all units smaller than a hundredth of a second; and (d) finally, transform the resultant value in seconds back into minutes and seconds to obtain the converted time.

## Short-Course Conversion Factors (Men and Women)

| Event | Factor |
| :--- | :--- |
| 400 meters to 500 yards | 1.153 |
| 800 meters to 1,000 yards | 1.153 |
| 1,500 meters to 1,650 yards | 1.013 |
| All other events | 0.906 |

Please note the conversion table above does not reflect what is included in the NCAA Swimming and Diving Rules Book. This document reflects what will be used for selection to and seeding at the 2022 Division I swimming and diving championships.

All time standards, consideration standards and optional-entry standards may be achieved only in 25 -yard or $25-$ meter racing courses. No times achieved in 50 -meter courses will be eligible for selection.

## Altitude

Times achieved at an altitude of 3,000 feet or higher may be adjusted according to the following chart:

| Event | I <br> $\mathbf{3 , 0 0 0 - 4 , 2 5 0 ~ F t . ~}$ <br> Elevation | II <br> $\mathbf{4 , 2 5 1 - 6 , 5 0 0 ~ F t . ~}$ <br> Elevation | III <br> Above 6,500 Ft. <br> Elevation |
| :--- | :---: | :---: | :---: |
| 100 Yards/Meters <br> (Individual Events) | .0 | .10 | .15 |
| 200 Yards/Meters <br> (Individual Events) | .5 | 1.2 | 1.6 |
| 500 Yards-400 Meters <br> (Individual Events) | 2.5 | 5.0 | 7.0 |
| 1,000 Yards/800 Meters | 6.3 | 11.4 | 18.5 |
| 1,650 Yards/1,500 Meters | 11.0 | 20.0 | 32.5 |

Subtract the time above from the actual time achieved. A relay team may use a conversion that is four times the appropriate figures listed above. This is the time to be used on the entry form.
