2024-25 SPORT TAB REDESIGN

COMING JANUARY 2025: A redesign of the Compliance Assistant 2.0 Sport tab will be implemented in early January to enhance functionality necessary for the CA 2.0/Academic Portal integration project. This document will detail all aspects of the Sport tab redesign to help users become familiar with these impending changes.

Note: This redesign has been configured to cause little to no disruption to current CA 2.0 data. As detailed in the sections below, users will not be required to make any immediate changes or bulk updates as a result of the Sport tab redesign. NCAA IT developers will be migrating data impacted by the below changes on behalf of the membership.

SPORT TAB REDESIGN OVERVIEW:

The Sport tab redesign will include the following changes, which will be described in further detail throughout this document.

Sport Tab Additions
- History Status link will catalog all status changes (including dates) associated with each student-athlete over the course of their enrollment at your institution.
- Data field that specifically addresses the question "Did SA use a season of eligibility?"

Sport Tab Repurposed Statuses
- Participation status will only include information to record whether an SA competed or did not compete.
- Redshirt, Hardship Waiver, and Season of Competition Waiver statuses will be moved to the "Did SA use a season of eligibility?" status field.
- All statuses recorded to inform financial aid exemptions (e.g., Departure of Head Coach – Nonparticipant, Replacement Student-Athlete, etc.) will be redefined as Special Statuses.

Team Participation Update Screen Changes
- Participation Status and Special Status responses will be updated to reflect changes made on the Sport tab.
- "Did SA use season of eligibility?" will be added as an additional field to the Team Participation Update screen.

CSV and XML Imports/Exports
- XML Schema File and API Token Instructions (for bridges to campus software) will be updated to reflect redefined statuses. **NOTE: users will not be required to make any changes to existing system bridges until after the academic year.**
- "Did SA use a season of eligibility?" column header will be added to the SA Year Sport table.

Ad-Hoc Reporting
- "Did SA use season of eligibility?" status field will be added to the 'SA Year Sport' table.

SPORT TAB STATUSES:

In January 2025, statuses available on the Sport tab will be repurposed/recategorized to enhance functionality for integrating the Academic Portal into Compliance Assistant 2.0. The below chart provides a reference for the migration of statuses into new categories.

New Status Field	Status	Former Status Field
Participation Status: indicates whether an SA participates in competition, regardless of whether the participation triggers the use of a season of competition.	Participated in varsity contest	Participation Status
	Participated in subvarsity contest (DII Only)	Participation Status
	Did not compete in a varsity contest (DI Only) Did not compete (DII Only)*	Special Status
Special Status: includes mostly only statuses that impact counter status based on financial aid applied on the Financial Aid tab.	Departure of Head Coach – Nonparticipant	Participation Status
	Exhausted Eligibility – Fifth Year Aid	Participation Status
	Medically unable to participate	Participation Status
	Exhausted Eligibility – COVID-19	Participation Status
	Replacement Student-Athlete	Participation Status
	Undergraduate Four-Year Transfer	Participation Status
	Varsity squad member during the championship segment	Participation Status
Did SA use season of eligibility?	No/Redshirt*	Special Status
	Hardship Waiver	Special Status
	Season of Competition Waiver**	N/A

*   *Currently, Redshirt/Did Not compete is located in Special Status as a single status. The redesign splits the status into the categories listed above to enhance the accuracy of record keeping. Specifically, with sport specific legislation in Football and Men's Wrestling, participating in competition does not always equate to the use of a season of eligibility.*

**   *Prior to the redesign, users relied on manually updating the Seasons Used field and notes section to record when a student received an approved season of competition waiver. This status will be added to the "Did SA use a season of eligibility?" status field to more accurately record such instances. Note: users will still be required to manually reduce the Seasons Used field if the season of competition waiver is granted after the SA has already been rolled over to the next academic year.*

Incrementing Rules – Seasons Used

Upon release of the Sport tab redesign, incrementing of the Seasons Used field (i.e., increase of the Seasons Used field by one) will be solely based on the response provided in the "Did SA use a season of eligibility?' field, using the following logic:

Response	Incrementing Rule
Yes	Seasons Used field will increase by one (1) upon rollover.
No/Redshirt	No change to the Seasons Used field.
Hardship waiver granted*	
Season of competition waiver granted*	

*   *Users will still be required to manually reduce the Seasons Used field if a hardship or season of competition waiver is granted after the SA has already been rolled over to the next academic year.*

STATUS HISTORY LINK:

The Sport tab redesign includes the addition of a Status History link to display status changes over the course of an SA's enrollment.
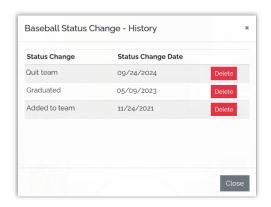

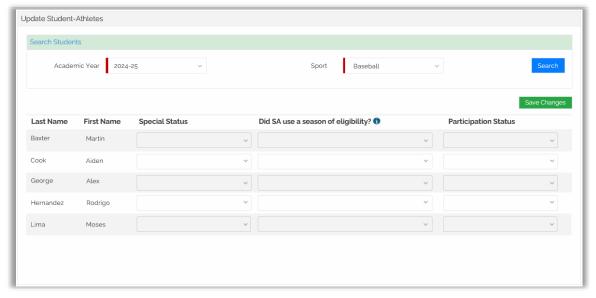

The Status History link will display both the status and date of the status change in chronological order, beginning with the most recent status change.

Further, the most recently added status change and date will be displayed on the Sport tab screen in the Status Change and Date fields.

If more than one status change is added to an SA's profile on the same day, the status that was added last will be display on the Sport tab screen and will be listed first in the Status History pop-up window.

TEAM PARTICIPATION UPDATE SCREEN:

Following the release of the Sport tab redesign, the Team Participation update screen will include a column for updating the "Did SA use a season of eligibility?" field. Updates to this field via the Team Participation update screen will be reflected on each SAs individual profile.

CSV/XML IMPORT AND EXPORT

As noted in the Sport Tab Redesign overview, users will not be required to make any immediate changes to existing system bridges that imports data from a campus system into CA 2.0. Such updates will need to be addressed after the 2024-25 academic year.

During the 2024-25 academic year, current bridge imports will be routed through an NCAA developed bridge that will automatically move statuses from the current field to the new field. At the conclusion of the academic year, institution's will be required to make permanent changes to their existing bridges.
