

Steps To Calculate 2-4 Transferable GPA

2-4 TRANSFERABLE GPA CALCULATION

STEP 1

ADD all credits that transferred from all two-year colleges attended.

STEP 2

ADD in any credits that are normally transferable to the institution but did not transfer due to an insufficient grade (e.g., failed or “D” grade courses that would have otherwise transferred).

STEP 3

SUBTRACT physical education activity credits that exceed the two-credit limit, unless the student-athlete is a PE or education major and the institution requires the activity credits.

Total Quality Points

for normally transferable credits

Total Credits

that are normally transferable

KEEP IN MIND

- For PE or education majors, the calculation may include up to the minimum number of physical education activity credits that are required for the specific degree program.
- For repeated courses, use the grade from the latest attempt.
- Remedial courses may not be included in the calculation.
- Ignore any institutional credit caps in this calculation.
- NCAA 2-4 transferable GPA may be different than the institution's 2-4 GPA calculation.

See NCAA Bylaw 14.3.4.5.3.2 for more information and exact language.

NCAA TRANSFERABLE GPA CALCULATION

Only use the transferable courses and grades from the two-year college attended after the student-athlete's last full-time enrollment at a four-year institution to calculate the 2-4 transferable GPA.

35 = Number of credits that transferred

49 = Number of credits that are normally transferable

15 = Number of credits that did not transfer due to grade

1 = Number of PE activity credits excluded

115 quality points

on normally transferable credits

= 2.346

49 credits

that are normally transferable
