

Call for Proposals: 2019 NCAA Graduate Student Research Grant Program
Application Deadline: May 3, 2019

The NCAA Research Committee is pleased to announce the 2019 NCAA Graduate Student Research Grant Program. The goals of the program are: (1) to stimulate research on intercollegiate athletics; (2) to foster contributions to the empirical research on intercollegiate athletics; (3) to provide financial support to graduate students interested in engaging in high-quality research related to intercollegiate athletics, and (4) to assist NCAA institutions and the public in gaining access to new, outstanding research in this field.

The Research Committee invites research proposals examining the role of intercollegiate athletics in higher education and the college student-athlete psychosocial experience. High quality studies on topics of interest to the NCAA membership will receive the highest consideration. Research topics may include, but are not limited to:

- Analytic philosophical/historical accounts of intercollegiate athletics;
- Best practices for academic support of student-athletes;
- Diversity and inclusion issues in intercollegiate athletics;
- Finances of intercollegiate athletics;
- Student-athlete integration into the campus community;
- Student-athlete satisfaction with the college experience;
- The impact of participation in intercollegiate athletics on the academic or social experiences of student-athletes; and
- The relationship between athletics time commitments and academic success.

IMPORTANT NOTE: This grant program is intended to support research primarily in the social and behavioral sciences. Students whose research is nested within exercise sciences, physical health and safety are encouraged to explore funding opportunities through their academic and professional organizations.

Award Details

The research grant is a one-time award set at a maximum of \$7,500. Recipients will be provided with an expense-paid trip to the Research Committee's 2020 meeting to present their findings. Recipients are required to submit a summary (limited to 750 words) of research findings suitable for publication on the NCAA website prior to the Research Committee meeting. The research is expected to culminate in an article suitable for publication in a scholarly journal, or in a completed master's thesis or doctoral dissertation, which will be shared with the NCAA.

Eligibility

Applicants must be enrolled in a graduate program at an NCAA member institution at the time of application submission and the proposed research must be *in progress* during the award period. Thus, projects should have received approval from one's advisor or dissertation/thesis committee prior to proposal submission. Completed studies are not eligible to receive funding. Research grants are intended to support students conducting research in conjunction with a doctoral dissertation or master's thesis, or for external publication in a scholarly journal.

Term of the Grant

Research must commence by January 1, 2020. Preliminary findings (at minimum) or final results are to be shared with the Research Committee in September 2020. Understanding that graduate students may need additional time to draft, submit and defend their thesis, the end of the grant term will be set based on the timeline submitted by the applicant in their proposal.

Funding Restrictions

A maximum of \$7,500 will be awarded to each grant recipient to support the collection, analyses and dissemination of their research. Funding requests for educational expenses cannot exceed \$2,000 and funding for hardware (e.g., laptop computer) not central to the *collection* of research may not exceed \$1,000 (please see the FAQ for this program for further clarification). Indirect costs will not be funded. Funds will be disbursed to the appropriate unit at the recipient's institution (e.g., sponsored projects, campus foundation). An initial payment for 90 percent of the award will be disbursed after terms and conditions are signed by the designated institutional officer and, if necessary, after human subjects approval has been granted. The final 10 percent of the award will be disbursed after the grantee submits the research summary to the Research Committee in fall 2020.

Submission Rules and Deadline

NCAA grants and scholarships are operated from the NCAA Program Hub. Applications **must** be uploaded to this website directly (<http://www.ncaa.org/programhub>). Applicants should expect the process (including Program Hub registration) to take 15-20 minutes. Those submitting grants who have not accessed the Program Hub previously will need to create a profile. Detailed instructions can be found [here](#). A confirmation page will be displayed after the proposal is submitted. Completed submissions must be entered into Program Hub by **5 p.m. (Eastern time) May 3, 2019**.

Application Requirements

Proposal. Only proposals adhering to the required format will be reviewed. All sections of the proposal are limited to 8.5"x11" pages with one-inch margins on all sides, double-spaced, in Times New Roman (or similar) 12-point font. The following sections are required and should be merged into a single PDF document:

- 1. Title Page.** Please list research study title, name and institution of the student applicant, the applicant's address, phone number and email address, and the name and contact information for the institutional grant or foundation officer who will support the applicant if funded.
- 2. Proposal Narrative.** (Limited to four double-spaced pages.) The narrative should be structured as follows:
 - a. Abstract.** (Maximum of 100 words.) The abstract should be a summary of the proposed research, anticipated findings and implications.
 - b. Research Questions.** (Maximum of 100 words.) List the research questions that guide the proposed study.
 - c. Methodology.** How will research questions be answered? Describe the research design, sample/subject selection and recruitment, means of data collection, instruments/protocols to be used and plan for analyses.
 - d. Significance/Potential Implications.** Discuss the significance of the research and the practical application of your anticipated findings to the NCAA membership (institutions of higher education, athletics administrators and/or student-athletes).
- 4. Bibliography.** Provide citations for any works cited in the narrative using APA, MLA, or the citation style of your discipline.

5. **Timeline.** (Not to exceed one page.). List the beginning and termination dates for the proposed research. A list of the projected dates of completion of major milestones in the progress of the proposed research should be included. This list must include dates for submission of the research brief (September 2020) and final manuscript or thesis to the NCAA.
6. **Budget and Budget Justification.** (Not to exceed one page). The line item budget should total no more than the maximum award amount of \$7,500. Research expenses are intended to support the gathering, analyzing, and/or dissemination of the data, including academic conference travel. The justification will provide support for how funds will be used in the research project. Sample budgets are included on the grant [website](#).
7. **Resume/Curriculum Vitae.** (Not to exceed two pages, single-spaced text permitted). Please include your resume or abbreviated *curriculum vitae*.
8. **Additional Materials.** Copies of any survey instruments and/or interview protocols that will be used in the study.

Professional References. In addition to submitting the proposal, applicants will submit the name and contact information for two references in Program Hub during the application process. A link to a brief (four-question) on-line recommendation form will be sent to both references Monday, May 6, and the form must be completed by Friday, May 24, 2019. *Applicants without two references submitted on their behalf will not be considered.*

References should be graduate advisors, professors and/or others who can affirm that the applicant and proposed study meet the eligibility requirements, speak to the specifics of the research proposal, and affirm the applicant's ability to successfully answer the research questions posed using the methods selected and sample identified (e.g., by noting relevant coursework or previous research employing the described methods, and/or demonstrating confidence that the applicant can access the sample population).

Applicant Resources

The NCAA Graduate Student Research Grant [website](#) includes important resources for applicants, including:

- FAQ document.
- List of previously awarded grants and abstracts.
- Sample funded proposals.
- Mock budgets and budget narratives.
- Example of the reference form.
- Evaluation rubric.

Grant Decisions

The NCAA research staff will conduct an initial review of all completed proposals to ensure they meet the submission requirements outlined above. Proposals that meet the requirements will then be reviewed by the Research Committee, which is comprised of athletics administrators and faculty athletics representatives.

The Research Committee will make final funding decisions and all applicants will be notified of the status of their submission by **October 1, 2019**.
